- The applicable basic charges for one year, plus one month demand charge. The demand value will be the average demand of the fully operational/pumping system demand set during the previous irrigation season or prior to the disconnect/discontinuance of the service. For services without usage history, the demand will be calculated by the District based upon service characteristics (e.g. kW based on HP).

**Production Cost Adjustments**

In the event that adjustments are made to the District's wholesale cost of power, charges or credits shall be made to this rate accordingly. Such charges or credits shall be billed separately as "Production Cost Adjustments." If changes are made to the wholesale supplier's power rate for the District, the District reserves the right to change this rate to reflect the wholesale supplier changes.
